

Workflow fit before implementation.

A free qualification call, an optional paid review, and a bounded implementation only when the workflow is feasible.

01 / Workflow Fit Call

Free · 15–20 minutes

A short conversation to determine whether a relevant workflow and feasible next step exist. It is not a free technical audit or free implementation.

02 / Workflow Feasibility Review

£400 UK / \$500 US · Delivery target: 2–3 business days

One discovery session; one sanitized CSV sample of up to 50 rows; a workflow map; compatibility and risk findings; and a written, bounded implementation recommendation. No implementation or deployment is included.

03 / Prospect Dominion Workflow Pilot

£2,500 UK / \$3,000 US · 30-day initial paid design-partner engagement

Subject to feasibility: one bounded workflow in a customer-controlled environment; supported CSV input; one implemented prioritization path; one human approval gate; and one already-supported and tested action provider or type. The current scope is up to 200 target accounts and five users, subject to feasibility. Includes documentation, handover, agreed acceptance criteria, and provenance, action-result, or audit functionality where supported.

04 / Workflow Care & Improvement

£750 UK / \$950 US per month

Only after successful deployment where ongoing support is appropriate. Includes up to four defined hours of maintenance or small changes and one operational review. Hosting, third-party costs, major development, and 24/7 support are excluded.

Initial test prices: These prices are not validated by completed customer purchases. Scope, data, provider support, and feasibility must be confirmed before paid work starts.

Open-source product: Prospect Dominion Core is MIT-licensed and self-hostable. Paid services cover scoped implementation, configuration, deployment support, and handover—not exclusive access to the source. Review the [public repository](#), its [self-hosting Quickstart](#), and the [MIT license](#).

Aethonex is pre-revenue and pre-incorporation; UK incorporation is planned. No general-purpose multi-tenant SaaS, universal connectors, guaranteed outcomes, or customer adoption is claimed. This overview is not a technical audit or an implementation offer.
